said step of distorting includes distorting the input audio signal so that after the high frequency, the input audio signal decreases in amplitude as per increasing frequencies toward the high end.

REMARKS

The undersigned appreciates the courtesy afford by the Examiner in granting a telephone interview to discuss the above referenced Office Action. The undersigned believes that the above amendments to the claims reflect those changes which the Examiner indicated would overcome the pending §103 rejection of the claims and would put this application into condition for allowance.

Respectfully submitted,

By *Harold C. Knecht III* 12/19/97
